Yup, looks like a prototype. I found another that seems created later - screenshot of main menu attached.

I found this report I did for you in January 1995, The State of Online Television - it's kind of embarrassingly sassy and opinionated.

I have an invoice #1 on Jan 2, 1995 that lists the billing period beginning Dec 1 1994.

Wow, that file really is a time capsule…. We did launch a website that year, so this is probably some kind of incomplete prototype/draft." Definitely incomplete. For example, if you click on Past Seasons, then Subject Index, it only shows two subjects.

Interesting that the Wayback Machine has first capture of pbs.org/pov in December 1996:
https://web.archive.org/web/19961225160711/http://www.pbs.org/pov/

And if you click on Main Menu, you have to go to the next capture (6/7/97) to actually see what it looked like. But that is a real blast from the past!

Do you remember when you started doing stuff for POV?

Do you recall if this was ever hosted or if it was just a prototype? It's archaic in such interesting ways, including under the link "Other Television Sites" it only lists two sites, PBS and CPB.
